SKILLS:

Web Development & UX/UI Design:

Building and designing responsive websites using some of the latest technologies including ReactJS, JavaScript ES6, NodeJS, GraphQL, REST API, Redux, HTML5, CSS3, Python, Flask, JSON, MongoDB, SQL, AWS, Linux, Git, Heroku, UX/UI Design, asset inventory, content modeling, wire framing, mockups, prototyping.

Projects:

Portfolio Website - http://www.megajon.com/

The website features some of my current projects, as well as some old projects from my days in film school. It is built from scratch using ReactJS, Redux, NodeJS, HTML/CSS, and JavaScript.

Prototype
figma.com/proto/3XIXT25nqF1L6Q1B1ZzHxb/megajon-portfolio?node-id=16%3A2&scaling=scale-down

Content model diagram:

Chapter - https://github.com/freeCodeCamp/chapter

Chapter is a new open source event hosting platform started by freeCodeCamp as an alternative to the new pricing structure recently proposed by meetup.com. The product is intended to be a self-hosted platform where users can create and organize local groups and events.

UXPin Mockup

Python Pirates Website - https://github.com/megajon/new-website

The Portland Python Pirates meetup group is in the early stages of redesigning and rebuilding their current website https://www.pythonpirates.org/. Early design materials include asset inventory, content models, application flow diagrams, and an interactive prototype.

New design prototype:
